

Landing Page Assignment

Question 1: Music Artist Landing Page (Profile, Bio, Social Buttons)

Create a static landing page for a music artist using HTML and CSS, featuring their profile image, a short bio, and three social media buttons styled with Bootstrap icons.

artist-landing.html

```
<!DOCTYPE html>
<html>
<head>
  <title>Artist Landing Page</title>
  <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css" rel="stylesheet">
  <link href="https://cdn.jsdelivr.net/npm/bootstrap-icons@1.11.3/font/bootstrap-icons.css"
rel="stylesheet">
</head>
<body>

  <div class="container text-center mt-5">

    

    <h2>Arjun Mehra</h2>
    <p class="text-secondary mx-auto" style="max-width:500px;">
      Singer-songwriter blending indie-pop with soulful Indian melodies.
      Known for chart-topping singles and electrifying live performances
      across the country.
    </p>

    <div class="mt-3">
      <a href="#" class="btn btn-outline-danger rounded-circle mx-1"><i class="bi bi-instagram"></i></a>
      <a href="#" class="btn btn-outline-primary rounded-circle mx-1"><i class="bi bi-facebook"></i></a>
      <a href="#" class="btn btn-outline-dark rounded-circle mx-1"><i class="bi bi-twitter-x"></i></a>
    </div>

  </div>

</body>
</html>
```

Explanation: The profile image uses Bootstrap's `rounded-circle` utility for a circular avatar look, and the bio paragraph is centered with a constrained `max-width` for readability. The three social buttons combine Bootstrap Icons (`bi bi-instagram`, `bi bi-facebook`, `bi bi-twitter-x`) with Bootstrap's outline button classes (`btn-outline-danger`, `btn-outline-primary`, `btn-outline-dark`) and `rounded-circle` to create circular icon buttons matching each platform's brand tone.

Question 2: Spotify-style Featured Playlists Row (Bootstrap Grid)

Use Bootstrap's grid system to arrange three featured playlists (like Spotify) in a responsive row, each with a cover image, playlist name, and a 'Listen Now' button.

featured-playlists.html

```

<!DOCTYPE html>
<html>
<head>
  <title>Featured Playlists</title>
  <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css" rel="stylesheet">
</head>
<body>

  <div class="container mt-4">
    <div class="row g-4">

      <div class="col-md-4">
        <div class="card h-100">
          
          <div class="card-body text-center">
            <h5 class="card-title">Chill Vibes</h5>
            <a href="#" class="btn btn-success">Listen Now</a>
          </div>
        </div>
      </div>

      <div class="col-md-4">
        <div class="card h-100">
          
          <div class="card-body text-center">
            <h5 class="card-title">Workout Beats</h5>
            <a href="#" class="btn btn-success">Listen Now</a>
          </div>
        </div>
      </div>

      <div class="col-md-4">
        <div class="card h-100">
          
          <div class="card-body text-center">
            <h5 class="card-title">Late Night Jazz</h5>
            <a href="#" class="btn btn-success">Listen Now</a>
          </div>
        </div>
      </div>

    </div>
  </div>

</body>
</html>

```

Explanation: The `row` with three `col-md-4` columns divides the 12-column grid evenly into three equal columns on medium screens and larger, placing the playlists side by side. Below the `md` breakpoint, columns default to full width (`col-md-4` only applies at `md+`), so on small/mobile screens the cards automatically stack vertically — making the row responsive without any extra CSS. Each card uses `h-100` so all three stay equal height regardless of content length.

Question 3: Flipkart-style Product Showcase (Responsive: 4 → 2 per row)

Design a Flipkart-style product showcase section with four product cards in a row using Bootstrap card components, ensuring the layout collapses to two cards per row on mobile screens.

product-showcase.html

```

<!DOCTYPE html>
<html>

```

```

<head>
  <title>Flipkart Style Product Showcase</title>
  <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css" rel="stylesheet">
</head>
<body>

  <div class="container mt-4">
    <div class="row g-3">

      <div class="col-6 col-md-3">
        <div class="card h-100">
          
          <div class="card-body">
            <p class="card-title mb-0">Wireless Earbuds</p>
          </div>
        </div>
      </div>

      <div class="col-6 col-md-3">
        <div class="card h-100">
          
          <div class="card-body">
            <p class="card-title mb-0">Smart Watch</p>
          </div>
        </div>
      </div>

      <div class="col-6 col-md-3">
        <div class="card h-100">
          
          <div class="card-body">
            <p class="card-title mb-0">Bluetooth Speaker</p>
          </div>
        </div>
      </div>

      <div class="col-6 col-md-3">
        <div class="card h-100">
          
          <div class="card-body">
            <p class="card-title mb-0">Laptop Backpack</p>
          </div>
        </div>
      </div>

    </div>
  </div>

</body>
</html>

```

Explanation: Each product column uses two responsive classes together: `col-6` (applies on the smallest screens, giving 2 columns = $6+6=12$) and `col-md-3` (applies at the `md` breakpoint and up, giving 4 columns = $3 \times 4=12$). Because `col-md-3` overrides `col-6` once the screen reaches medium width, the layout shows exactly 4 product cards per row on desktop/tablet, and automatically collapses to 2 cards per row on mobile screens, exactly as the hint describes.

Question 4: Sticky Navbar with Home/About/Contact Links (Refactor)

Refactor your landing page to include a sticky navigation bar at the top using Bootstrap's navbar component, with links to Home, About, and Contact sections.

artist-landing-with-navbar.html

```

<!DOCTYPE html>
<html>
<head>
  <title>Artist Landing Page with Sticky Navbar</title>
  <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css" rel="stylesheet">
</head>
<body>

  <!-- sticky-top keeps the navbar pinned to the top while scrolling -->
  <nav class="navbar navbar-expand-lg navbar-dark bg-dark sticky-top">
    <div class="container">
      <a class="navbar-brand" href="#home">Arjun Mehra</a>
      <button class="navbar-toggler" type="button" data-bs-toggle="collapse" data-bs-target="#navMenu">
        <span class="navbar-toggler-icon"></span>
      </button>
      <div class="collapse navbar-collapse" id="navMenu">
        <ul class="navbar-nav ms-auto">
          <li class="nav-item"><a class="nav-link" href="#home">Home</a></li>
          <li class="nav-item"><a class="nav-link" href="#about">About</a></li>
          <li class="nav-item"><a class="nav-link" href="#contact">Contact</a></li>
        </ul>
      </div>
    </div>
  </nav>

  <section id="home" class="container text-center mt-5">
    
    <h2>Arjun Mehra</h2>
    <p class="text-secondary">Singer-songwriter blending indie-pop with soulful Indian melodies.</p>
  </section>

  <section id="about" class="container mt-5">
    <h3>About</h3>
    <p>Arjun began his musical journey in 2015 and has since released three studio albums.</p>
  </section>

  <section id="contact" class="container mt-5 mb-5">
    <h3>Contact</h3>
    <p>For bookings, email: booking@arjunmehra.com</p>
  </section>

  <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/js/bootstrap.bundle.min.js"></script>
</body>
</html>

```

Explanation: The page from Question 1 has been refactored by wrapping the profile section in an `id="home"` section and adding two new sections, `id="about"` and `id="contact"`. The navbar now includes `sticky-top`, a Bootstrap utility that keeps the navbar fixed at the top of the viewport as the user scrolls down the page. Each nav link (`href="#home"`, `#about`, `#contact"`) points to the matching section id, so clicking a link jumps the page to that section.

Question 5: Footer with Social Icons + Consistent Color Scheme

Add a footer to your page with Instagram-style social icons and ensure the entire layout remains visually cohesive by applying a consistent color scheme using Bootstrap utility classes.

footer-section.html

```

<!-- Add this just before the closing </body> tag, after the Contact section -->

<footer class="bg-dark text-light text-center py-4 mt-5">

```

```

<div class="mb-2">
  <a href="#" class="text-light mx-2"><i class="bi bi-instagram fs-4"></i></a>
  <a href="#" class="text-light mx-2"><i class="bi bi-facebook fs-4"></i></a>
  <a href="#" class="text-light mx-2"><i class="bi bi-youtube fs-4"></i></a>
  <a href="#" class="text-light mx-2"><i class="bi bi-spotify fs-4"></i></a>
</div>
<p class="mb-0 small text-secondary">&copy; 2026 Arjun Mehra. All rights reserved.</p>
</footer>

<!-- Bootstrap Icons stylesheet needed in <head> for the icons above -->
<!-- <link href="https://cdn.jsdelivr.net/npm/bootstrap-icons@1.11.3/font/bootstrap-icons.css"
rel="stylesheet"> -->

```

Explanation: The footer reuses `bg-dark` and `text-light` — the same classes already used on the sticky navbar in Question 4 — so the navbar and footer share the exact same dark background and light text color, tying the top and bottom of the page together visually. The social icons use Bootstrap Icons sized up with `fs-4`, and `text-light` keeps them white so they stay legible against the dark footer background, keeping the whole page's color scheme (dark navbar, light body, dark footer) consistent and cohesive.
